

# BRYAN USI CANLAS

**Talented Front-end, Blockchain, and NFT developer**

## PROFILE

I am a senior Web front-end developer with strong skills and mature experience in modern web development. I have hands-on experience in building highly customized web applications such as CMS, LMS, Trading Platforms, NFT Action Platforms, etc. with various web languages and frameworks.

I have designed several NFTs including not only 2D but also 3D art collections. I have strong skills and experience in unity and 3D. I have experience in building NFT games with unity.

I can work as not only an independent but also a committed team player in anytime.

Thanks!

## SKILLS

## EDUCATION

**Lyceum of the Philippines University**

(Private university in Manila, Philippines)

September 1, 2007 – August 27, 2012

I mastered web programming language and computer science.

I have good skill in developing web site.

## WORK EXPERIENCE

### Globe Telecom

Front-end development

March, 2014–May, 2014

I have built full site with 4 team members.

Most of my working is done in front-end side.

I used Vue.js, HTML, CSS, Bootstrap, Java script, jQuery and Ajax.

### International Container Terminal Services

Front-end development

August, 2017–April, 2019

I worked with 15 team members.

I have built very fancy interface with pixel perfect.

### As a freelancer on freelancer.com

Web & Blockchain development

June, 2021–

I have built lots of websites and NFT minting sites and marketplaces with React.js, solidity, web3.js and truffle.

I can work as not only an individual contributor but also a committed team member since I worked in several global teams. I have a good command of English so that I can have a friendly conversation or chat session with you. I can provide 24/7 service on freelancer.com.
